

Supervisor's evaluation of the doctoral student's activities during the study

Student: Ibrahim Ahmed Salman Alameri

Supervisor: prof. Ing. Jitka Komárková, Ph.D.

Title: **Modification of the AODV Routing Discovery Mechanism in Wireless Mesh Networks**

Mr Alameri was enrolled to study at FEA University of Pardubice in the autumn of 2019. He is a full-time student enrolled in the doctoral degree study programme entitled “Applied Informatics”.

Immediately after enrolment, he became actively involved in the Institute of System Engineering and Informatics work. He participated in the teaching of Management Informatics 1 and Geographic Information Systems 1 and 3 courses.

He has been involved in research activities as well. He regularly participates in SGS projects and is a very active team member. His activities have already led to the publication of two articles in a journal with IF 2,411 (WoS Q2), two articles in journals indexed in Scopus (Q2 and Q3) and several indexed conference papers.

He completed his traineeship at Nottingham Trent University (15. 12. 2021 – 5. 8. 2022). He attended several courses at the university and worked in the laboratory to run many simulations.

He is a very active person and a beneficial member of our team. He has proved the necessary academic skills during the past time. He is a hard-working person and a well-focused researcher, and he has become an active member of our team. He is highly motivated to succeed and can quickly learn new things.

Pardubice, 22. 11. 2023

prof. Ing. Jitka Komárková, Ph.D.
